8. Dot/Continuous setting
This setting determines whether or not each touch of **Open** and **Close** will cause the roller shutter to move, or it will be necessary to briefly hold it.

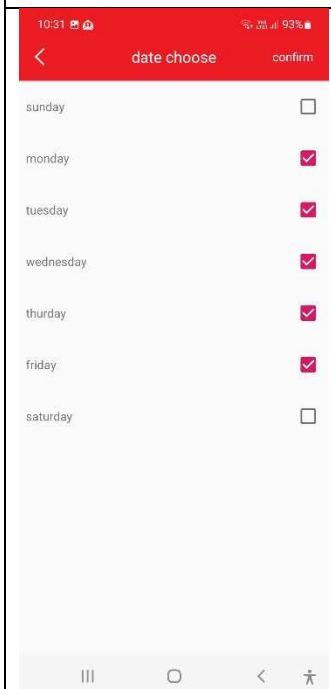

9. Winter / Summer mode
This setting is related to the light sensor in the solar panel *: if you don't have one, you don't have to do anything.
**instruction is available on website smart-blinds.eu*

10. Timing settings allow you to set the opening or closing time of blind. Press  to start

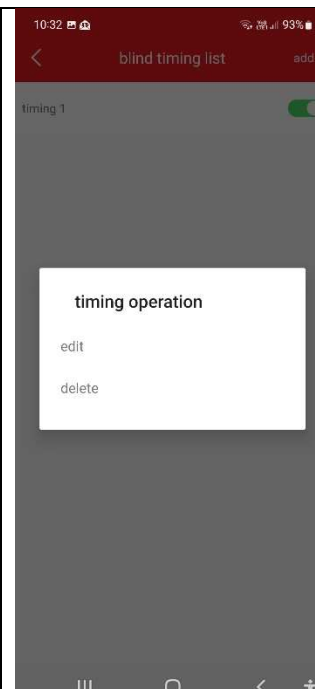

10. Timing settings
Set the position of the blind moving the button 
Select the exact time and press duplicate to select days.

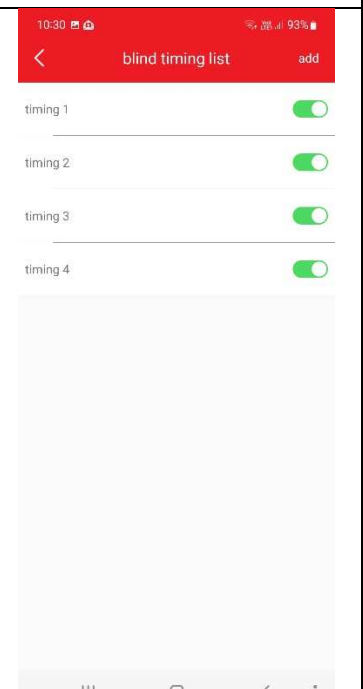

10. Timing settings
Select days and **confirm**.

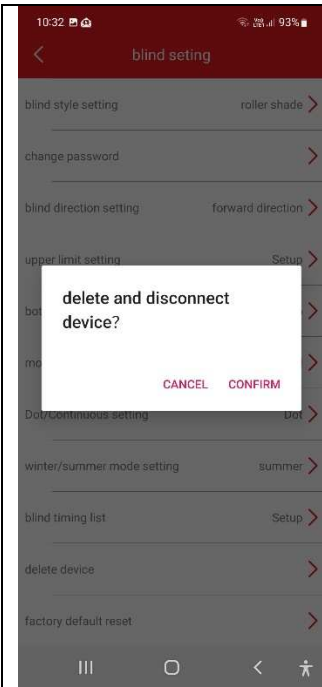

10. Timing settings
To start the timer, press: 

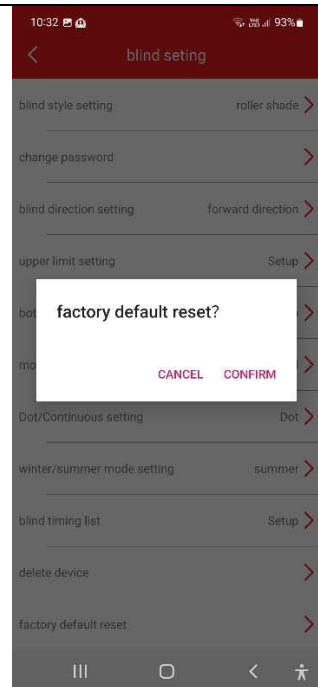

10. Timing settings
To edit or delete a timer hold your finger on its name longer.

10. Timing settings
You can set a maximum of 4 different timers.
To edit / delete, press and hold your finger longer on the timer.

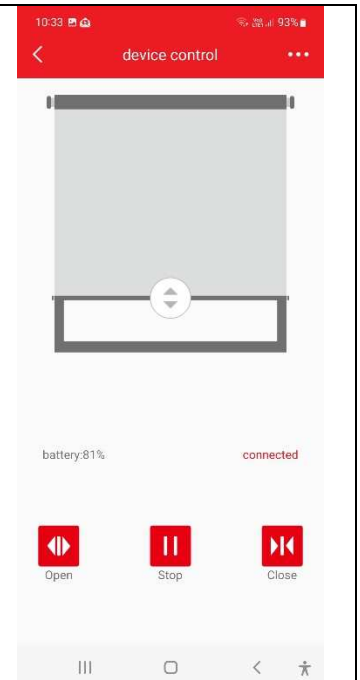

11. Delete the blind
This setting is used to remove the blind from the app.

12. Clear all settings
You can delete all settings. This will restore the initial default settings.

Device control
The start screen of the application shows a list of all added blinds. Smart Blinds within bluetooth range will connect automatically after 2 to 3 seconds. Select the blind to control it.

Device control
You can control the roller shutter using buttons **Open - Stop - Close**, or by moving your finger on the drawing of the roller blind. This screen also shows the battery level of the Smart Blinds device.

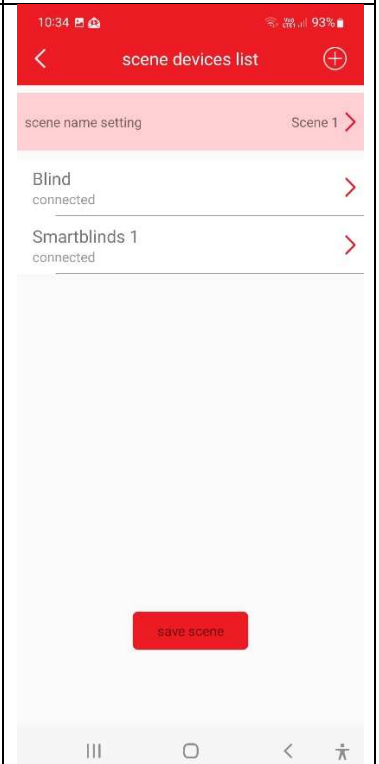

Scene control
Smart Blinds devices can be combined into groups to perform planned scenarios, e.g. to open all blinds in a room with one button. To add first scene press

Scene control
Press scene name to add your name of scene. Then press  to add chosen blinds. (note: to add a roller blind, it must have the "connected" status in the application).

Scene device position
Set the desired roller blinds target position and press **Confirm**.

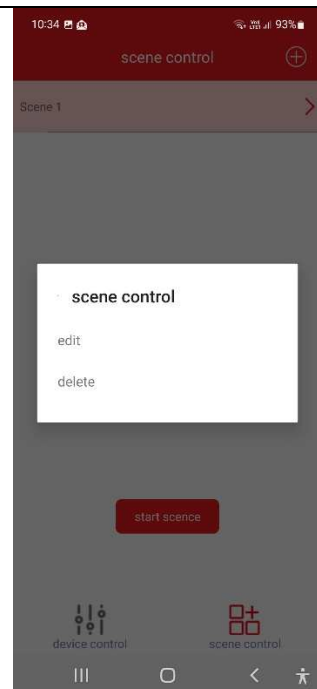

Scene device list
After adding the chosen blinds, press **save scene**.

Scene control

Press the name of the selected group, and then the **start scene** button - the blind will move to the preset positions.

Scene control

Press and **hold** scene name to edit or delete a scene

Device control

Press device control to go back to start screen..

The manual applies to Smart Blinds version 1.0 (from 04/12/2020).

In the future, there may be new versions of the application introducing additional possibilities and functions.

Find information on this subject on the smart-blinds.eu website or directly in the application store (Google Play or Apple APP Store).
